MANAGEMENT DISCUSSION AND ANALYSIS

a. Industry Structure and Developments:

The Non Banking Financial Companies (NBFC) industry in the private sector in India is represented by a mix of few large and national level Companies and a large number of small and medium sized, regional and local Companies. These NBFCs provide a variety of services including fund based and free based activities as well as cater to retail and non-retail markets and niche segments.

As a part of the economic reform, the Government is reducing the interest rate to lower the overall finance cost. Inspite of this and other banking reforms, no major momentum is witnessed in credit obtained by the industrial sector including core industry.

The imposition of stricter registration and other regulatory compliance requirements over the years have led to better investor protection and improved overall industry environment.

b. Opportunities and Threats:

The Company faces normal market competition in its business. The working of the NBFCs continued to be adversely affected by defaults due to recession and absence of proper and speedier recovery loss and procedure, paucity of funds, over regulations, lace of level playing field, additive tax treatments and disallowance and encroachment by unprofessional and inexperienced fly-by-night operators in the industry.

The continuance of slow down in economy coupled with the reduction in the interest rate would continue to affect the income level of your Company in the current year. However, with the effective control over the expenses and prudent development of available resources, the Management is hopeful of maintaining satisfactory results.

c. Segmentwise Performance:

The Company is operating in single segment. Hence, there is no need of reporting segment wise performance.

d. Recent Trend and Future Outlook:

The Company is likely to continue to maintain its focus on capital market activities including trading in securities and emerging products in derivatives. The Company will also look for any attractive opportunities in other growth areas in the financial services sector.

e. Risks and Concerns:

The Company is exposed to the normal industry risk factors of interest rate volatility, credit risk, market risk and operational risk. It manages these risks by maintaining a conservative financial profile and by following prudent business and risk management practises.

With lower and lower interest regime, the Company's gross income may suffer a set back as being a finance Company its main income is return/yield on its deployable funds.

f. Internal Control Systems and their Adequacy:

The Company has adequate systems of internal Controls commensurate with its size and operations to ensure orderly and efficient conduct of business. These controls ensure safeguarding of assets, reduction and detection of fraud and error, adequacy and completeness of the accounting records and timely preparation of reliable financial information.

g. Financial Performance with respect to Operational Performance:

The financial performance of the Company for the year 2008-09 is described in the Directors' Report.

h. Material Developments in Human Resources and Industrial Relations Front:

The Company is in process of employing and developing HRD department.

Cautionary Statement:

Statement in this Management Discussion and Analysis Report, describing the Company's objectives, estimates and expectations may constitute 'Forward Looking Statements' within the meaning of applicable laws or regulations. Actual results might differ materially from those either expressed or implied.
